X402 ECOSYSTEM REGISTRY

"Trust the merchant, trust the platform" is the only audit trail today. It does not scale to a world where agents pay on your behalf.

03 / 14

THE STAKES

SETTLE

THE PROTOCOL

04 / SOLUTION

Four BLAKE3 hashes. Committed on Solana. Re-derivable in any browser.

Anyone with the canonical JSON can re-derive these. **Pure function. Zero servers in the trust path.**

SETTLE

CROSS-RUNTIME PARITY

05 / PARITY

Three runtimes. Byte-identical hashes.

```

$ node
import { receiptHash } from "@settle/sdk"
> receiptHash(canonical)

// → b3:7e92f0a3...d61ac4d

```

```

$ python
from settle import receipt_hash
>>> receipt_hash(canonical)

# → b3:7e92f0a3...d61ac4d

```

```

$ cargo run --bin hash
// settle::receipt::hash
> hash(&canonical)

// → b3:7e92f0a3...d61ac4d

```

WHAT'S SHIPPED

SETTLE

THREE THINGS CONVERGED

08 / WHY NOW

2025 made the receipt gap a **present** problem.

01 • SETTLEMENT

Solana

Fast and cheap enough that committing four hashes per payment is finally economical.

02 • RAILS

USDC + Solana Pay

The payment rails matured. Stable unit, programmable transport, real merchants.

03 • DEMAND

AI agents

Crossed from research demos into production. They are spending real money today.

~400ms slots • < \$0.001 per ix

\$5B+ stablecoin TVL on Solana

14 x402 implementations in 98 days

All three converged. **The receipt gap stopped being a future problem.**

08 / 14

WHY NOW

The moat is one row: verifiable without provider servers.

	STRIPE	HELIO	X402 RAW	SETTLE
Agent-native credentials	—	—	partial	✓
On-chain receipts (kernel-committed)	—	partial	—	✓
Revocable in one transaction	—	—	—	✓
Verifiable without provider servers	—	—	—	✓
Cross-chain signing under one policy	—	—	—	✓

@PRATIIPKY

11 / 14

FOUNDER

Pratik Tripathi.

Final semester of an MCA in Blockchain Development, India. Wrote "The Blockchain Path" — a beginner's guide to blockchain.

- 01 Shipped consumer dapps and product infrastructure on Base and adjacent EVM networks.
- 02 Worked in an ecosystem ambassador program — developer onboarding and plain-language workshops.
- 03 Hosts X community calls and Discord events for an audience of 6,500+ around protocol education.
- 04 Organized two offline university events in India in 2025 — Bansal University, and one in Chhattisgarh for Movement Labs.
- 05 Data Science certification — Python, ML fundamentals, applied statistics.
